## SUMMARY

As a Senior Software Engineer with over 11 years of experience, I specialize in developing high-quality backend and frontend applications across diverse domains. I have worked extensively with technologies such as PHP (Laravel, CodeIgniter, Symfony), C# (Entity Framework), databases (SQL Server, MySQL, PostgreSQL, FirebirdSQL), and cloud platforms (AWS, Azure).

On the frontend, I leverage ReactJS, VueJS, jQuery, and JavaScript to build dynamic and scalable solutions. I am a quick learner, adaptable, and passionate about software engineering. I thrive in collaborative environments, value clean and efficient code, and always strive to improve my skills by exploring new technologies and best practices. My goal is to deliver high-performing, scalable, and secure applications that meet business needs and exceed expectations.

---

## EXPERIENCE

### Software Engineer

#### SoftDesign

July 2021 – Present, Porto Alegre, RS

- Currently working as a Senior Software Engineer .NET at Springpoint Motorbase (USA), Contributing to the redevelopment of an industrial ERP system, maintaining core functionalities while implementing new features, adopting modern technologies, and transitioning to a scalable microservices architecture for enhanced performance and flexibility.
- Engineered robust PHP solutions for a leading employee benefits card company, enhancing legacy systems and creating new, high-impact features and APIs.

### Software Engineer

#### Deliver IT

June 2018 – July 2021, Porto Alegre, RS

- Worked as an outsourced developer on projects for Laureate Universities, later acquired by Ânima Educação, which manages multiple universities across Brazil. Led the development of a new API to list available courses and manage enrollments in a new app. Additionally, contributed to the maintenance and enhancement of the company's ERP system.

### Software Engineer

#### Blueshift

February 2018 – April 2018, Pelotas, RS

- Contracted for three months to support the back-end team at AG2 on a major Toyota project. Contributed to a large-scale campaign to enhance the website in preparation for the launch of a new car model.

### Software Engineer

#### POSSIBLE

March 2016 – January 2018, Pelotas, RS

- Provided maintenance and enhancements for various CMS platforms used in SIEMENS projects, ensuring stability, performance, and improved functionality.

### Software Engineer

#### Blueshift

May 2014 – March 2016, Pelotas, RS

- As a PHP and .NET developer I provided maintenance and new features to a wide range of projects, from english learning platform to big projects like Toyota Brazil website. I also had some challenges like developing all the backend for Rio 2016 olympics "Olympic torch challenge", a campaign where schools could participate creating torch replicas and winning prizes.

### Software Engineer

#### Sitionet

January 2013 – May 2014, Pelotas, RS

- Developed new features and maintained legacy systems, ensuring stability, performance, and continuous improvement.

### Software Engineer

#### Andrade & Magnus LTDA

January 2013 – January 2014, Pelotas, RS

- Rebuilt the entire legacy system, collaborating closely with the client through regular meetings to identify improvements while preserving essential features. Designed and developed the backend, frontend, and infrastructure to ensure a robust and scalable solution.

## EDUCATION

### System Analysis and Development

SENAC • Pelotas, RS • 2013

### Artificial Intelligence and Machine Learning

## CERTIFICATIONS

---

### Ultimate AWS Certified Developer Associate

Udemy

### Vue 3

Alura • 2025

### .NET: Memory Management for Performance Optimization

Alura • 2023

### C#: Apply good refactoring practices and make your code more readable

Alura • 2023

### Kafka: Producers, Consumers and Streams

Alura • 2023

### ASP.NET Core Web API

Udemy • 2022

### Complete React Developer

Udemy • 2020

### Python Django Dev To Deployment

Udemy • 2020

### Microsoft Azure Fundamentals

SISNEMA Informática • 2019

### Go: The Complete Developer's Guide

Udemy • 2016

### Complete ASP NET MVC Web Development

Udemy • 2016

### Docker Mastery: The Complete Toolset

Udemy • 2016

---

## SKILLS

---

Back End:

PHP, CodeIgniter, Symfony, CakePHP, Laravel, Silex, Slim, C#, .NET, Entity Framework, Go, Python, MySQL, PostgreSQL, FirebirdSQL, Microsoft SQL.

Front End:

HTML, CSS, JQuery, ReactJS, VueJS.
